

Ángel Luis Lara Martín

Computer Engineer | Cloud & AI

Madrid, Spain | +34 662 22 16 16 | angelluislara@hotmail.es | linkedin.com/in/angelllm | github.com/aangell98

PROFILE

Computer Engineer specialized in Cloud and AI, currently a Cloud & AI Specialist Intern at Microsoft. Experience in Azure and AWS cloud architecture, AI agents and RAG systems, software and web development, data analysis, DevOps and cybersecurity. Focused on delivering measurable value to technology teams.

EXPERIENCE

Cloud & AI Specialist Intern, Microsoft

January 2026 - Present

- Designed and optimized scalable Azure cloud architectures, improving performance and cost efficiency for enterprise customers.
- Drove AI, application modernization and cloud adoption initiatives, accelerating customer cloud onboarding.
- Authored technical documentation and partnered with cross-functional teams to resolve complex requirements.

Cybersecurity Technician, Tata Consultancy Services (Roche Farma project)

June 2022 - August 2022

- Administered server permissions and user privileges, enforcing least-privilege across enterprise environments.
- Reviewed and approved security certificates, safeguarding system integrity.
- Audited access regularly, ensuring compliance with corporate security protocols.

Global Operations Center Technician, Tata Consultancy Services (Roche Farma project)

March 2022 - June 2022

- Diagnosed and fixed incidents on global infrastructure, minimizing system downtime.
- Supported international customers, troubleshooting issues end to end.

KEY PROJECT

Entangle (Bachelor's Thesis), github.com/aangell98

2025 - 2026

- Built a config-driven AI agent of 6 workers with RAG over a vector store (~11k fragments), reaching 96.7% routing accuracy.
- Mapped and visualized the open-source quantum computing ecosystem on GitHub, surfacing maintenance risk in 81.7% of repositories.
- Validated with 1,087 automated tests (0.96 modularity). Stack: Python, React, Azure OpenAI, Cosmos DB, Docker, GitHub Actions.

EDUCATION

BSc Computer Engineering, Information Systems, University of Castilla-La Mancha

2022 - 2026, Talavera de la Reina, Toledo

- Graduated July 2026. Coursework: distributed architectures, cloud technologies, AI fundamentals, databases, process automation.
- Bachelor's Thesis: Entangle, mapping and analysis of the quantum computing ecosystem on GitHub.

Network Systems Administration Technician, IES Arcipreste de Hita

2020 - 2022, Azuqueca de Henares, Guadalajara

- Linux and Windows Server administration, Active Directory, networking and web services.

CERTIFICATIONS

Microsoft Azure Fundamentals (AZ-900), Microsoft Data Fundamentals (DP-900), Microsoft AI Fundamentals (AI-900)

SKILLS & TECHNOLOGIES

Cloud & AI: Microsoft Azure, AWS, Azure OpenAI, RAG, AI agents, cloud architecture

Programming & Data: Python, JavaScript, React, Java, SQL, data analysis

Systems & DevOps: Linux, Windows Server, Docker, GitHub Actions, cybersecurity

LANGUAGES

Spanish (native), English (advanced, C1) | Class B driving license. Willingness to travel.
